## INTRODUCTION

Other than the web interface access for administrators, Grandstream UCM6xxx IP-PBX series offer to each extension a “User Portal” allowing to manage extension own data and information by the user from the web UI with no need of administrator intervention. Using the User Portal will reduce administrator interventions to the system for basic extension operations which will be managed by the extension owner directly.

A user portal account is automatically available upon extension creation and is designed to give access to a variety of features covering user information, extension configuration, CDR (Call Detail Records), and value-added features such as Fax Sending, Call Queue, wakeup Service and CRM (Customer relationship management). These features are categorized into 3 main menus: Basic Information, Personal Data and Value-added Features.

**Note:** UCM6XXX series include UCM620x series, UCM630x series, UCM630xA series and UCM6510.

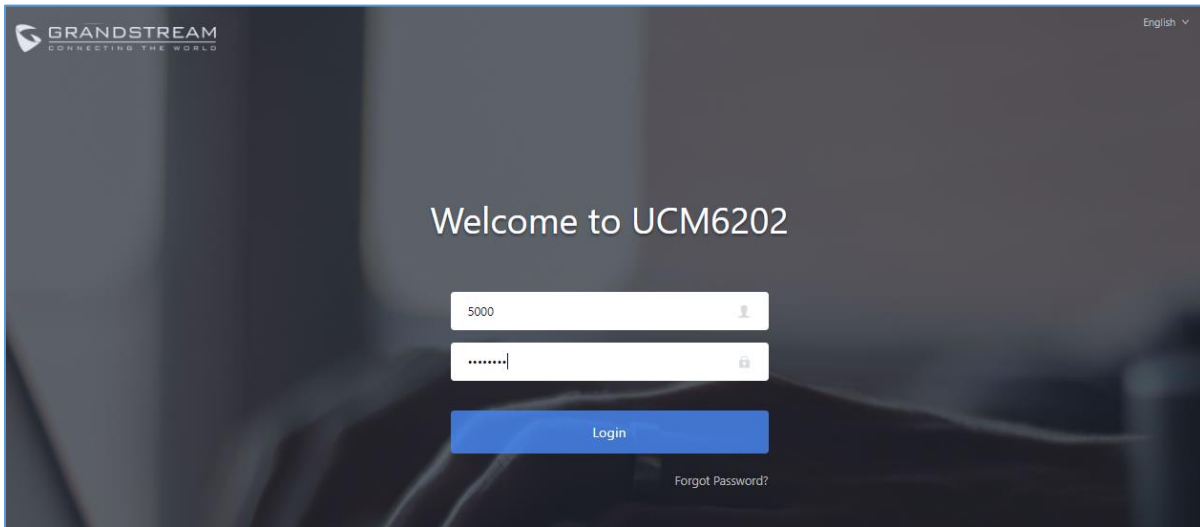

This document introduces the user portal features and offers step by step instructions to use them.

## LOGIN TO THE USER PORTAL

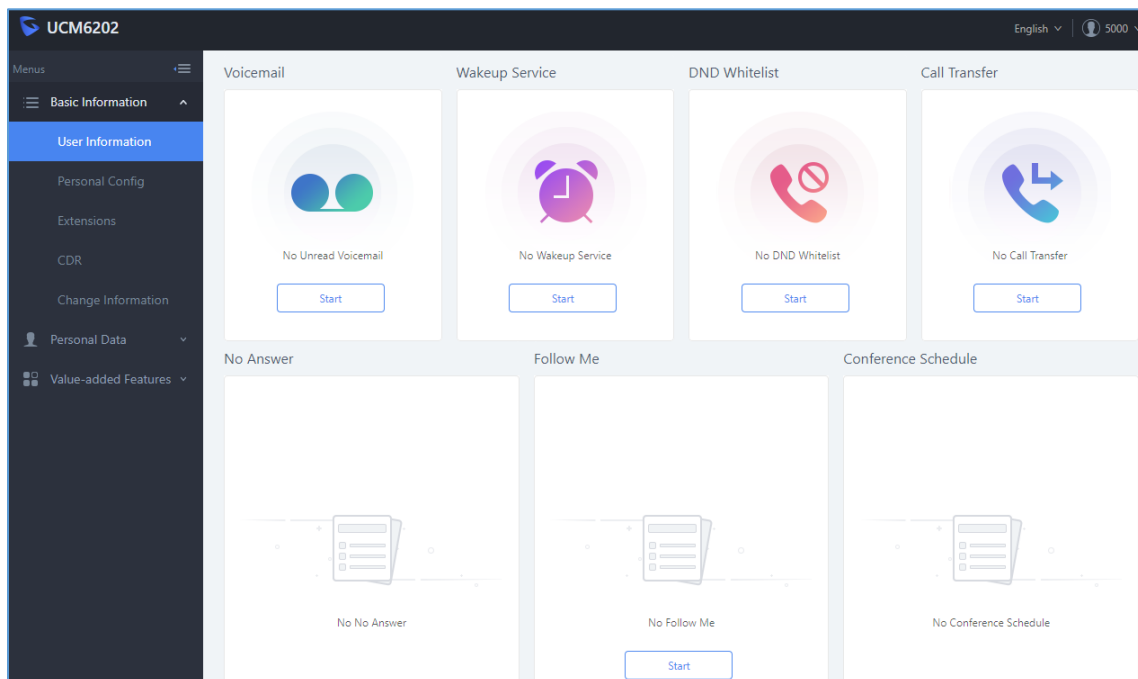

After creating an extension, the super Administrator can configure/edit the login credentials for the user portal under UCM6xxx Web GUI → **Maintenance** → **User Management** → **User Information**.

Users will use only their extension number and the password set by the admin to access to the user portal as shown in below figure.

**Figure 1: User Portal Login**

The UCM6xxx User Portal Web GUI appears once you click “Login”. The following figure shows the user portal interface:

**Figure 2: User Portal Layout**

## BASIC INFORMATION

Basic Information menu includes following sub-menus:

- User Information.
- Personal Config.
- Extensions.
- CDR (Call Detail Records).
- Change Information.

### User Information

User Information page displays the extension call features statuses including Voicemail, DND whitelist, Call Transfer, No Answer, Follow Me, and Conference Schedule.

The user can press **Start** button to enable and configure a call feature directly.

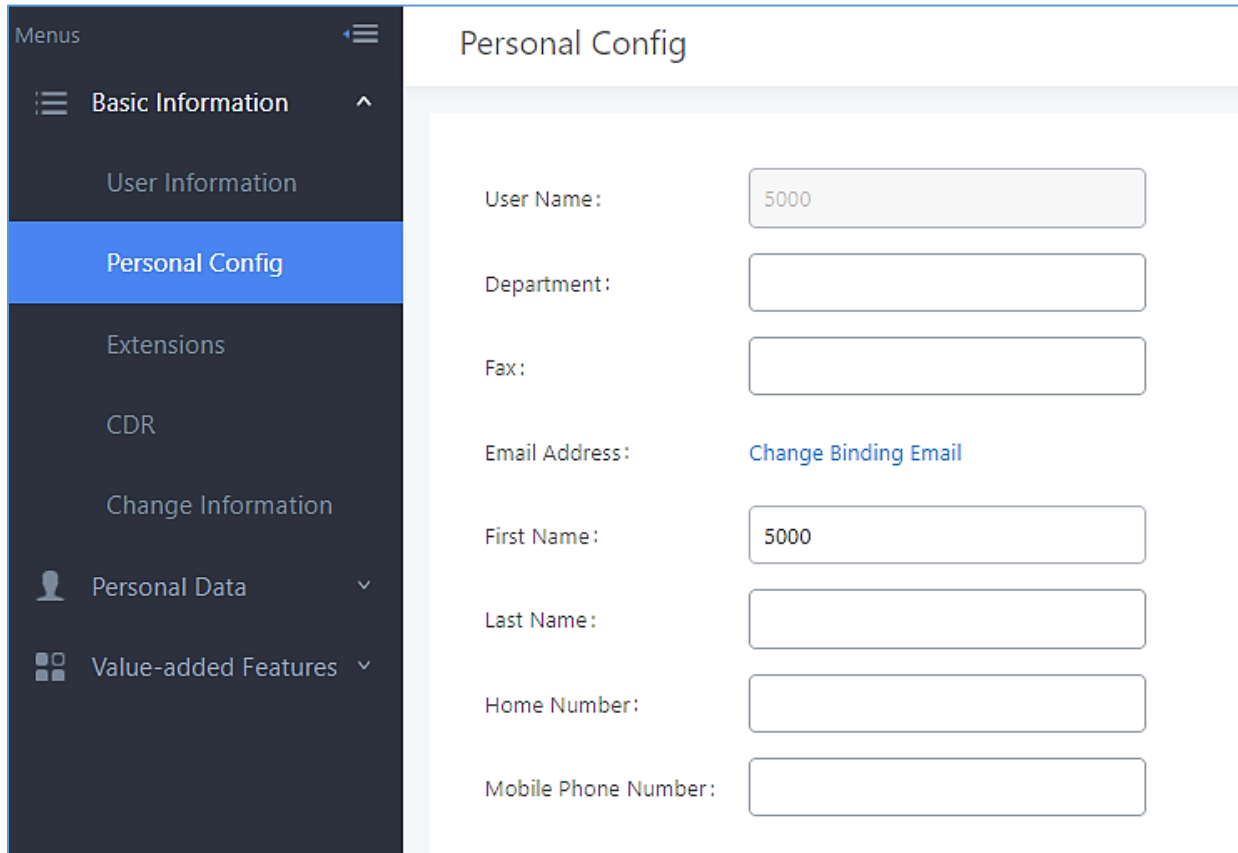

Figure 3: Basic Information → User Information

## Personal Config

Personal Config page allows the user to edit his/her personal information including Department, Fax Number, Email Address, First Name, Last Name, Home Number and Mobile Phone Number.

The “User Name” cannot be edited from the User Portal. Only Admin can edit this field if needed.

Personal Config

## Extensions

Extension page is divided into 3 tabs as follows:

1. **Basic Settings:** Allows to:
  - Change the SIP Extension Password and Authentication ID.
  - Enable/Disable Voicemail and set the Voicemail Password.
  - Enable/Disable the extension.
  - Select the extension prompts language.

2. **Features:** The extension configuration parameters in this menu provide the user with a variety of call features to perform, such as:

- **Presence:** Set up presence status of the extension (6 statuses are available).
- **Call Transfer:** Configure call forward for each presence status. (Call Forward Unconditional, Call Forward No Answer, Call Forward Busy and FWD Whitelist).
- **Do Not Disturb:** Enable/Disable DND feature and configure its conditions including DND Whitelist.
- **Ring Simultaneously:** Enable/Disable “Ring Simultaneously” feature and configure its conditions.
- **Seamless transfer privilege control:** Select the extensions that can perform seamless transfer to the user’s extension.
- **Ring Timeout:** Configure the ring time out parameter for the extension.

## PERSONAL DATA

Personal Data menu includes following sub-menus:

- Follow Me.
- Voicemail.
- Recording Files.
- Fax Files.

### Follow Me

This page allows the user to configure Follow Me feature for his own extension.

Follow Me is a very useful feature to locate a user by ringing different extensions and external numbers in a pre-defined order. This feature allows users to be reached at numerous devices, such as mobile, home-telephone, office-telephone, or softphones.

Follow Me User Preference

Total: 1   / page Goto

**Figure 11: Personal Data → VoiceMail**

User can also customize his Voicemail greetings messages by uploading a custom prompt for each greeting message. To do so, user needs to click on **Voicemail Prompt** and upload a prompt for each status.

### Notes:

- Available greetings are:
  - **Busy**: The corresponding message will be played when the extension is busy.
  - **Unavail**: The corresponding message will be played when the extension is unavailable.
  - **Temp**: Highest priority. If exists, the corresponding message will be played.
  - **Greet**: This is the welcome message played when reaching extension VM.

The priority is “temp > busy/unavail > greet”.

- Sounds file must be PCM encoded, 16 bits at 8000Hz mono with mp3/wav format or raw ulaw/alaw/gsm file with .mp3/.wav/.ulaw/.alaw/.gsm suffix. The file size must be less than 5MB.

Voicemail Prompt Cancel

Voicemail prompt will be played when user enters voicemail. "busy" indicates the extension is busy, "unavail" indicates the extension is unavailable. Priority: temp > busy/unavail > greet  
 Sound file must be PCM encoded, 16 bits at 8000Hz mono with mp3/wav format, or raw ulaw/alaw/gsm file with .mp3/.wav/.ulaw/.alaw/.gsm suffix. The file size must be less than 5MB.

Busy:	<input type="button" value="Choose file to upload"/>	<input type="button" value="Download"/>	<input type="button" value="Delete"/>
Greet:	<input type="button" value="Choose file to upload"/>	<input type="button" value="Download"/>	<input type="button" value="Delete"/>
Temp:	<input type="button" value="Choose file to upload"/>	<input type="button" value="Download"/>	<input type="button" value="Delete"/>
Unavail:	<input type="button" value="Choose file to upload"/>	<input type="button" value="Download"/>	<input type="button" value="Delete"/>

**Figure 12: Personal Data → VoiceMail – Voicemail Prompt**

## Recording Files

From this menu, the user can find all the Extension Call Recordings under the UCM6xxx portal Web GUI → **Personal Data** → **Recording Files**, with the possibility of playing them on the user portal interface by clicking  button or download them to his personal computer.

Recording Files					
Caller	Callee	Call Time	Size	Options

Figure 14: Personal Data → Fax Files

**Note:** Two copies of each fax file are available, one in .pdf format and a second in .tiff format.

## VALUE-ADDED FEATURES

Value-added Features menu includes following sub-menus:

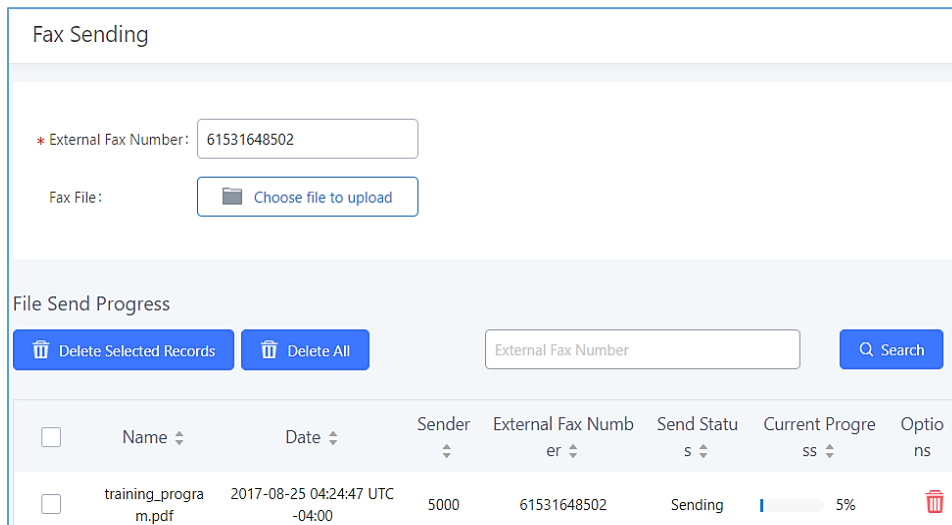

- Fax Sending.
- Call Queue.
- Wakeup Service.
- CRM User Settings.

### Fax Sending

This page provides ability to send PDF or TIF/TIFF fax files to external fax destination.

The steps below describe the basic configuration required to send a fax to an external fax number:

1. Go to UCM6xx User Portal GUI → **Value-added Features** → **Fax Sending**.
2. Enter the destination “External Fax Number”.
3. Click on “Choose file to upload” and Select the file you want to send.

The screenshot displays the 'Fax Sending' interface. At the top, there is a form with an 'External Fax Number' field containing '61531648502' and a 'Fax File' section with a 'Choose file to upload' button. Below this is the 'File Send Progress' section, which includes 'Delete Selected Records' and 'Delete All' buttons, an 'External Fax Number' search box, and a 'Search' button. A table below shows the progress of a fax send:

<input type="checkbox"/>	Name	Date	Sender	External Fax Number	Send Status	Current Progress	Options
<input type="checkbox"/>	training_program.pdf	2017-08-25 04:24:47 UTC -04:00	5000	61531648502	Sending	5%	

**Figure 15: Value-added Features → Fax Sending**

#### Notes:

- Only PDF or TIF/TIFF files are accepted.
- The “File Send Progress” field shows all the information about the faxes that have been sent and gives to the user an idea about the percentage of the fax current progress.

### Call Queue

As member of a call queue, the user can manage his calls from the user portal. The page also provides a user dashboard displaying waiting calls and call statistics.

The following figure shows the Switchboard seen by the user 5000 who is a queue agent and can see only his own information under the user portal.

Call Queue					
<a href="#">6500 (Extensions)</a>					
Waiting			Proceeding		
Status	Caller	Callee	Position	Talk Time	Options
	3000	6500	1	2017-08-25 06:44:34	
Status	Caller	Callee	Talk Time	Options	
	3003	5000	2017-08-25 06:47:08		

Figure 16: Value-added Features → Call Queue

<b>Waiting</b>	This menu shows the current waiting calls along with the caller id and the option to hang-up call by pressing on the  button.
<b>Proceeding</b>	Shows the current established calls along with the caller id and the callee (agent) as well as the option to hang-up or to transfer the call using the  button.
<b>Agents</b>	Displays the agent extension status (idle, ringing, in use or unavailable) along with some basic call statistics and agent's type (static or dynamic).

## Wakeup Service

User can schedule a reminder or wake up calls to its extension using the UCM6xxx user portal.

Please refer to the following steps:

1. Login to the user portal on the UCM6.
2. WakeUp service can be found under “**Value-added Features → Wakeup Service**”, click on [+ Create New Wakeup Service](#) to create a new wakeup service.
3. Configures the Name, Prompt, Date and Time for the user to make the wakeup to.
4. Click [Save](#) and [Apply Changes](#) to apply the changes.

<b>Enable Wakeup Service</b>	Enable Wakeup service.
<b>Name</b>	Enter a name to identify the wakeup service.
<b>Prompt</b>	Select the prompt to play for that extension.
<b>Custom Date</b>	If disabled, users can select a specific date and time. If enabled users can select multiple days of the week to perform the wakeup.
<b>Date</b>	Select the date or dates when to performs the wakeup call.
<b>Time</b>	Select the time when to play the wakeup call.
<b>Members</b>	Select the members involved within the wakeup group.

## CRM User Settings

User can start using CRM feature once settings on admin access are configured with supported CRM platforms (currently only SugarCRM and Salesforce are supported).

Refer to the following steps to Login to CRM account:

1. Navigate under UCM6xxx portal GUI → **Added-Value Features** → **CRM User Settings**
2. Click on Enable CRM.
3. Enter the Username associated with CRM Account.
4. Enter the Password associated with CRM Account.
5. Click on “Save” and “Apply Changes”.

### CRM User Settings

Enable CRM:

\* Username:

\* Password:

Login Status:

**Figure 18: Value-added Features → CRM User Settings**

The status will change from “Logged Out” to “Logged In” and the user can start then using CRM features.
