# UCM63XX Local PMS Guide

Property Management System (PMS) is a software application used in the hospitality industry to automate some hotel functions such as guest booking, guest details, etc...

Grandstream UCM63XX series have integrated a lightweight Local PMS providing the following hospitality features: set Room Status, Wake-up call, and more. For the use of small and medium properties without the need of integrating a 3rd party PMS software.

# Supported PMS Features

The UCM63xx supports a built-in PMS system targeting budget chain hotels, it gives the possibility to UCM administrators and Hotel staff to operate the check-in / check-out, and log customers' check-in information through the PMS user interface.

The features available on the Default PMS are as shown below:

| Features   |
|--|
| Room Management ( Add Rooms)                                     |
| Room Status (Check-in/Check-out records, Room availability view) |
| Wake-up service  |
| Maid Service   |

## **Basic Settings**

In order to use the Local PMS service on your UCM63XX, the PMS Module needs to be defined and set to "Local PMS", this configuration can be done on the Basic settings tab as shown in the screenshot below, to access the PMS settings, Click on Other Features, and Choose PMS on the drop-down menu:

| PMS                                       |                |                     |       |            |            |
|---|----------------|---------------------|-------|------------|------------|
| Basic Settings Room I                     | Management     | Room Status         | Wakeu | p Service  | Maid       |
| PMS Module                                | Local PMS      |                     | ~     |            |            |

PMS Basic Settings

Below are the definitions of the configuration parameters available for the Local PMS.

| Parameter                           | Description  |
|-------------------------------------|--|
| Wakeup Prompt                       | A customized prompts that can be played when the wakeup call is answered. To customize it please navigate to <b>PBX Settings</b> $\rightarrow$ <b>Voice Prompt</b> $\rightarrow$ <b>Custom Prompt</b>  |
| Room Status Update<br>Prompt        | Choose a previously uploaded prompt or upload the prompt which will be played when the room status is changed.<br>If the room status codes have been change, please update the Room Status accordingly.  |
| Back Up Voicemail<br>Recordings     | <ul> <li>Back up voicemail recordings to external storage after check-out,</li> <li>When Enabled, The user can set the SFTP server for storage purposes by defining the following attributes :</li> <li>Email Address: Configure the email address to send the backup to.</li> <li>Account: Configures the account on the SFTP server.</li> <li>Password: Defines the account password</li> <li>Server Address: Defines the SFTP server address (e.g., xxx.xxx.xxx:22).</li> <li>Destination Directory: Specify the directory in SFTP server to save the voicemail recordings to. Format: "xxx/xxx/xxx". If this directory does not exist, UCM will create this directory automatically.</li> <li>Test the Connection: This option tests the connection to the SFTP server defined.</li> </ul> |
| Sync Guest Name to<br>Phone         | Provisions the name of the checked-in guests to endpoints via Zero Config.<br>Requires endpoints to be discoverable and provisinable by Zero Config.   |
| Automatically Clear<br>Wakeup Calls | <ul> <li>Scheduled wakeup calls for rooms can be cleared upong checking in or checking out.</li> <li>None: The wakeup calls won't be automatically cleared.</li> <li>Check out: The wake up calls assigned to the guest will be cleared when they check out.</li> </ul>  |

|   | • Check In: The wake up calls assigned to a guest will be cleared when a new client checks in.                            |
|---|---|
| Automatically Clear Wave<br>Chat History  | If enabled, room Wave chat history will be automatically cleared upon check-in or check-out.                              |
| Automatically Reset<br>User/Wave Password | If enabled, the User/Wave password of the room extension will be automatically reset to a random password upon check-out. |

## Room Management

The room management service offers the possibility to manually add rooms to the Local PMS User interface, either individually or by applying a batch addition for multiple rooms.

To do that, select Room Management, then either:

### Add Room Manually

| PMS            |                       |                   |                |              |                   |         |
|----------------|-----------------------|-------------------|----------------|--------------|-------------------|---------|
| Basic Settings | Room Management       | Room Status       | Wakeup Service | Maid         |                   |         |
| + Add Room     | Delete Selected Rooms | + Batch Add Rooms |                |              |                   |         |
| ADDRESS \$     | ROOM NUMBER           | ¢ EXTENSION       | I≑ CAL         | L PRIVILEGES | CHECK-IN STATUS 🖨 | OPTIONS |
|                |                       |                   | No data        |              |                   |         |

Adding Room Manually

Enter the address, room number, and two extensions that match the room number from the list of available extensions,

| Create New Room    |          |   |  |
|--------------------|----------|---|--|
|                    |          |   |  |
| * Address:         | 1009     |   |  |
| * Room Number:     | 1009     |   |  |
| * Extension 1:     | 1009     | ~ |  |
| * Extension 2:     | None     | ~ |  |
| * Call Privileges: | Internal | ~ |  |
|                    |          |   |  |
|                    |          |   |  |

Assign an Extension to the Room

If only one extension is needed, Extension 2 can be set to "None"

After the Extension(s) is set, Define the Call Privilege to be one of the following options: Internal, Local, National, or International

| Create New Room  |               |   |
|------------------|---------------|---|
|                  |               |   |
| * Address:       | 1009          |   |
| * Room Number:   | 1009          |   |
| * Extension 1:   | 1009          | ~ |
| Extension 2:     | None          | ~ |
| Call Privileges: | Internal      | ~ |
|                  | Internal      |   |
|                  | Local         |   |
|                  | National      |   |
|                  | International |   |

## **1** Note

After guest checkout, any changes made to the calling privilege of the room's extensions during the check-in period will be automatically reset to the "internal" Privilege.

### Batch Add Rooms

Select the Batch Add Rooms :

| PMS            |                       |                   |                |          |             |                 |                             |
|----------------|-----------------------|-------------------|----------------|----------|-------------|-----------------|-----------------------------|
| Basic Settings | Room Management       | Room Status       | Wakeup Service | Mini Bar | Maid        |                 |                             |
| + Add Room     | Delete Selected Rooms | + Batch Add Rooms | 5              |          |             |                 |                             |
| ADDRESS \$     |                       | ROOM NU           | JMBER \$       |          | EXTENSION # | CHECK-IN STATUS | OPTIONS                     |
| 1000           |                       | 1000              |                |          | 1013        | Check-out       | 2 🛛                         |
|                |                       |                   |                |          |             | 6 <u>1</u> Þ    | Total: 1 10 / page ~ Goto 1 |

Batch Add Rooms

Begin with the Start address number, the Start room number, and the Start extension number,

| Batch Add Rooms          |        |  |
|--------------------------|--------|--|
|                          |        |  |
|                          |        |  |
| * Start Address Number : | 1009   |  |
| * Start Room Number :    | 1009   |  |
| * Start Extension :      | 1009 × |  |

| * Number of Extensions : | 1 2      |   |
|--------------------------|----------|---|
| * Create Number :        | 10       |   |
| * Call Privileges:       | Internal | ~ |
|                          | Preview  |   |
|                          |          |   |
|                          |          |   |

Batch Add Rooms Page

In case you want to configure two extensions Per Room, Switch the number of extensions from one extension to two, this will generate two extensions per Room number, as shown in the example below :

| Preview     | ×          |
|-------------|------------|
| ROOM NUMBER | EXTENSION  |
| 1009        | 1009, 1010 |
| 1010        | 1011, 1012 |
| 1011        | 1013, 1014 |
| 1012        | 1015, 1016 |
| 1013        | 1017, 1018 |
| 1014        | 1019, 1020 |
| 1015        | 1021, 1022 |
| 1016        | 1023, 1024 |
| 1017        | 1025, 1026 |
| 1018        | 1027, 1028 |
|             |            |

Batch Room Addition with two extensions

then add the create number that defines the total number of rooms with the corresponding extension(s):

| Batch Add Rooms          |          |   |
|--------------------------|----------|---|
|                          |          |   |
| Start Address Number:    | 1009     |   |
| Start Room Number:       | 1009     |   |
| * Start Extension :      | 1009     | ~ |
| * Number of Extensions : | 1 0 2    |   |
| * Create Number:         | 5        |   |
| * Call Privileges:       | Internal | ~ |
|                          | Preview  |   |
|                          |          |   |

## **1** Notes

- Please note that if the user is using "Batch Add Rooms", he/she can only add 100 rooms at a time.
- Please note that the number of the rooms is limited by the maximum number of extensions, assuming that each room has been assigned only one extension.

The user needs to account for the rooms which have two extensions.

Furthermore, the Call Privilege can be configured to set call types to Internal, Local, National, and International

| * Call Privileges: | Internal      | ^ |
|--------------------|---------------|---|
|                    | Internal      |   |
|                    | Local         |   |
|                    | National      |   |
|                    | International |   |
|                    |               |   |
|                    |               |   |

Setting up the call privilege

Finally, you can preview the created Rooms with their corresponding extension(s) by clicking the Button **Pre** 

Preview

The Preview will appear as

#### follows:

| Pr | eview       | ×         | < |

Multiple Rooms Selected

then Click on the

Delete Selected Rooms button to perform the action.

To delete all rooms, select all available rooms then click **Delete Selected Rooms** 

#### Room Status

Once the rooms are created, they will all be displayed in the Room status section with the status being either Check-out or Check-in, The attributes that are displayed are :

- **Room Number:** Displays the Room Number.
- Check-in status: Displays Check-in Status, either Checked-in or Not Checked-in.
- Check-in / Check-out: Changes the Check-in state of the room.
- **Room Status:** Displays the current Room Status of the room, it can be set to Available, Cleaning, Repairing, Cleaned, Room dirty, or Room closed, this gives the hotel staff a global view of the current state of all Property Rooms.
- Customer name: Displays the Customer's first and last name.
- Guest Category Code: Displays the Guest Category code, Guest codes are individualized to residents so they can be issued to their visitors.
- Arrival date: Displays the Customer's Arrival date.
- **Expected departure date:** Displays the Customer's Expected departure date.
- **Options:** By clicking the icon 🕜 you can configure other hidden attributes related to the Room occupation.

Room Status

### Modify Room Status

Once the room is created, you can configure additional attributes that are not displayed on the main page, to do that :

- 1. Click the Edit options Icon  $\widehat{\Box}$
- 2. the mandatory fields with the red star next to them will be already set since a Room status can not be marked as Checked-in if these attributes are not defined.
- 3. Define additional attributes such as Guest account, Guest Credit Money, Guest's Language, Call privileges (Set to internal by Default), and the Maid code that is defined on the Maid service tab.

Modify Room Status

## **1** Note

The room status is defined based on the current state of the Room, It can be set to the following states: Available, Cleaning, Repairing, Cleaned, Room Dirty, Room Closed.

Check-in Procedure

The Check-in Procedure requires the hotel staff member to enter specific attributes about the Guest's information, We will look at the example below to understand the procedure:

- The hotel staff member clicks on the Check-in Icon
- The following prompt is displayed :

| Check In   | :   | × |
|--|---|---|
| Once a customer has checked in system. Please do not modify na | , please manage customer information through the PMS<br>mes, languages, or calling privileges through the UCM system. |   |
| Room Number:   | 1010  |   |
| * Room Status:   | Cleaning  |   |
| First Name :   |   |   |
| Last Name:   |   |   |
| Guest Account:   |   |   |
| Guest Category Code:   |   |   |
| Guest Credit Money:  |   |   |
| * Arrival Date:  | Select date 🔛 Select time 🕒   |   |
| * Expected Departure :<br>Date                                 | Select date 🔛 Select time   |   |
| Language:  | Default v   |   |
| * Call Privileges:   | Internal ~  |   |
|  | Cancel  |   |

Check-in Window

- The Hotel staff member defines the Room Status from the drop-down menu, Fills in the mandatory fields that are: The Arrival date, Expected Departure date, and Call Privileges.
- The Hotel staff member can also fill in the optional fields such as the first and last name of the Customer, Guest Account, Guest Category Code, Guest Credit Money, and Language.
- Finally, Click on "OK" and the Check-in status will be set to "Checked-in"

#### Check-out Procedure

Once a customer has left the property, the status of the room should change to "Not Checked-in" by Default, In Order to do that Click on the Icon

Check Out and then Click "OK"

|          |              | × |
|----------|--------------|---|
| Check-ou | t: Room 1009 |   |
|          |              |   |
|          |              |   |
| Cancel   | Check Out    |   |

### Check-in and Check-out History

You can check the records of Check-in/Check-out actions by clicking on the Check-in/Check-out History as shown in the screenshot below :

| PMS              |                 |             |                |      |
|------------------|-----------------|-------------|----------------|------|
| Basic Settings   | Room Management | Room Status | Wakeup Service | Maid |
| Check-in/Check-o | out History     |             |                |      |

Once on the Check-in-Check-out History page, you can choose to delete a specific entry by clicking the icon 👘 next to the Record.

icon.

You can also search for a specific entry in the search filter, you can search by Room Number, Customer name, Arrival date, or Actual Check-Out date.

To delete all the records, Click on the En Delete Records

Delete Records

### **O** Note

Once the Delete records button is pressed, all the Check-in/Check-out History Records are deleted immediately without a confirmation pop-up

In some cases, guests will request the hotel staff to wake them up at a specific time, you can do that by configuring a wake-up time related to the room number

of the guest, where the specific IP phone on that room will ring the extension related to the room number at that specific time, this option is supported on the integrated local PMS on the UCM63XX.

### Wake-up service creation

The settings can be defined as follows :

• Select the wake-up service Tab, Click

to create a new wake-up schedule

Wakeup Service

- The configuration consists of defining some attributes such as :
  - 1. Room number: The room number on which the phone extension will ring at a specific time.
  - 2. **Repeat Cadence**: Determines whether the wake-up service will be repeated daily or once
  - 3. Wake-Up Time: Specifies the Exact wake-up time.

### Maid Service

The cleaning services in Hotels and properties can be managed thanks to the Maid service configuration option, this can be done by assigning a specific code and password to each available maid, these credentials will be used by the maids to change the status of the room to "Cleaning" or "Cleaned" by entering the specific PMS feature code followed by their credentials on the IP phone related to the Room number, this will help the Property manager to control the current state of the rooms, the specific person that was responsible for the cleaning task and also to enhance security protocols.

In order to configure the Maid service on the UCM63XX :

- Click on the Maid Tab of the Local PMS, Then Click + Add to add
- Add to add new Maid credentials

| PMS            |                 |             |                |      |         |
|----------------|-----------------|-------------|----------------|------|---------|
| Basic Settings | Room Management | Room Status | Wakeup Service | Maid |         |
| + Add          |                 |             |                |      |         |
| MAID CODE \$   |                 |             | PASSWOR        | D    | OPTIONS |
|                |                 |             | No I           | Data |         |
|                |                 |             |                |      |         |

Add a New Maid

#### • Add the Maid code and Password

| Create New Maid               |      |  |  |  |  |
|-------------------------------|------|--|--|--|--|
| * Maid Code :<br>* Password : | 1111 |  |  |  |  |
|                               |      |  |  |  |  |

Maid Settings

• Once confirmed, Click save and the Maid credentials will be displayed on the main page

| PMS            |                 |             |                |      |         |
|----------------|-----------------|-------------|----------------|------|---------|
| Basic Settings | Room Management | Room Status | Wakeup Service | Maid |         |
| + Add          |                 |             |                |      |         |
| MAID CODE \$   |                 |             | PASSWOR        | D    | OPTIONS |

#### Maid

The Maid credentials defined on the UCM are unique and can be linked to any available room defined on the Room management with the corresponding

Extension, this can be done by setting up a feature code specific to each Maid credential.

#### PMS Feature codes

The Local PMS service includes a pre-defined feature codes section exclusive for the PMS actions such as :

- PMS Wakeup service
- Update PMS Room Status
- PMS Remote Wake-up Service

The feature codes can be accessed on the UCM, by accessing **Call features=> FeatureCodes => Feature Codes** tab.

| PMS                    |     |          |                               |     |          |
|------------------------|-----|----------|-------------------------------|-----|----------|
| * PMS Wakeup Service : | *35 |          | * PMS Remote Wakeup Service : | *37 | <b>Z</b> |
| • Update PMS Room Sta  | *23 | <b>V</b> |                               |     |          |
|                        |     |          |                               |     |          |

These feature codes are dialed from the endpoint available in the hotel room or from the reception to trigger a specific action, these actions are communicated by an IVR system in the IP phone to give the user options to choose which action to perform exactly,

We will distinguish between the available options available for each action individually

#### PMS Wakeup Service

The PMS Wakeup Service can be accessed by dialing the feature code \*35. PMS Wakeup Service can be added, updated, activated, or deactivate based on the choices given by the IVR system, pressing a specific number can trigger the corresponding action.

For example, the IVR will be programmed to prompt the user to press "1" to add a wake-up service, Press "2" to update a wake-up service, Press "3" to activate a wake-up service, or Press "4" to deactivate a wake-up service

#### Update PMS Room Status

The status of the Room can be updated in two ways

1. Dial the room status feature code + maid code, listen to the prompt and then dial the appropriate key for the desired room status, this will trigger an IVR response asking you to choose either "Room Cleaning service" by clicking "1", or Room repair service by clicking "2"

Example: A maid with maid code 0001 dials \*230001, listens to the room status options prompt, and then dials 1 to change room status to Available.

2. Dial room status feature code\*maid code\*desired room status option key to quickly change the room status without needing to go through the system voice prompts.

Example: Maid with maid code 0001 dials \*23\*0001\*1 to change room status **Available**, that is in the case where the maid already knows the corresponding codes for each room status

### PMS Remote Wakeup Service

Dial this code to add, update, activate, and deactivate the PMS wakeup service for other extensions. this feature is used in the reception to manage many

endpoints at the same time, to do that you can enter the Room's Extension number followed by the Pound "#" key.
